PROFESSIONAL OBJECTIVES

As a recent graduate with a passion for coding and a solid foundation in Python, I am eager to embark on my career as a junior full-stack Python developer. My education and personal projects have equipped me with a strong understanding of web development, databases, and front-end technologies, making me well-prepared to tackle the challenges of a dynamic development environment. I am a highly motivated, detail-oriented individual who thrives on problem-solving and continuous learning. My goal is to secure a position where I can not only apply my existing knowledge but also gain valuable experience and expertise from a collaborative team. I am excited to contribute my skills to the creation of innovative web applications and to make a meaningful impact in the world of software development.

EDUCATION

BSc. Information Technology   2020 – 2023
Rathnavel subramaniyam college of arts and science   Coimbatore, India

COURSES

Python Full-stack
Ether Infotech
09/2023 – 01/2024 | Coimbatore, India

Creative Technology
RVS college of arts and science
Coimbatore, India

• Python Full-Stack Developer

• Creative Technology

SKILLS

• Html5, Css3, Bootstrap, Javascript, ReactJS, Python, Django, Sql

SOFT SKILLS

• Web Design, Front End, Back End, Python Development, Adaptable, Problem Solving, Collaborative, Teamwork, Understanding, Communication, Learning, Cooperation, Creative, Database Management.Critical Thinking, Attention to detail, Analysis, Organization, Resilience, Initiative, Empathetic, Time Management, Technical support, Interpersonal Skills, Adaptability, Research, Presentation skills.

PROJECTS

E-Clothing Website
1. Project Overview: I'm developed a project Online purchasing system using Python and the Django framework.
2. Backend Development: Python and Django were used for backend development, ensuring a robust and scalable system.The backend handled data storage, user authentication, and task management.
3. Database Management: MySQL was chosen as the database management system.MySQL efficiently stored and retrieved project data, ensuring data integrity.
4. Frontend Technology: The frontend of the project utilized HTML, CSS, and Bootstrap.This choice of frontend technologies ensured a user-friendly and responsive interface.

DECLARATION

"I certify that the information provided in this resume is true and accurate to the best of my knowledge."
